

I am a Flight Attendant who is not in favor of allowing passengers to use their cell phones in flight. There are too many trigger items already today that set off passengers trapped in an isolated tube with no place to escape until landing. Conversations on an airplane can be heard many rows ahead or behind and not everyone is interested in being a part of the cell phone conversation. Portable electronic devices have headsets that keep whatever is transpiring on the game, computer, DVD and etc. quiet and private. If someone cannot be without their phone for 2-3 hours then they should not be on the airplane!!!! There is already so much rage triggered in flight or almost and we defuse it, that we do not need to add to that possibility!!!!
